Subject: Motivation Letter for Study Visa Application (Type D)

Dear Visa Officer,

My name is Mustafa LOUZIMI , and I am writing in support of my study visa application following my admission to **the Master's Degree in Nanotechnology and Physics for Sustainability at the University of Salerno for the 2026/2027 academic year.**

My academic background is focused on physics and energy. I obtained a University Diploma of General Studies (DEUG) in Physical Sciences, followed by a Bachelor's Degree in Fundamental Studies in Mechanical and Energy .

The Master's programme at the University of Salerno represents a logical continuation of my academic background. With a foundation in Physical Sciences and Mechanical and Energy Engineering, I wish to deepen my knowledge of nanotechnology, physics, and sustainable technologies. This programme will enable me to develop advanced scientific and technical skills while gaining a deeper understanding of the application of physics and innovative technologies to current challenges in energy and sustainability.

Regarding the financial aspect of my studies and stay in Italy, my brother, Mr. Abdellah Louzimi, will be my financial guarantor. He has been working at **JESA** since June 2018 and currently holds the position of **Electrical Engineering Manager**. According to his latest payslip, his gross monthly salary is **MAD 57,954**, while his net salary amounts to **MAD 25,463**. He has committed to financially supporting me throughout my studies and stay in Italy. The relevant employment certificate, salary certificate, payslip, and other supporting financial documents are included in my visa application file.

My objective is to successfully complete this program and use the advanced knowledge and skills acquired at the University of Salerno to strengthen my professional career in the fields of renewable energy, advanced materials, and sustainable technologies.

I am fully committed to this academic project and respectfully request that you give favorable consideration to my study visa application.

Yours faithfully,

Mustafa LOUZIMI
